OBJECTIVE

Artificial Intelligence and Data Science undergraduate with hands-on experience in machine learning, deep learning, and LLM-based applications. Skilled in building end-to-end ML pipelines, explainable AI systems, and real-time analytics dashboards. Proficient in Python, ML frameworks, and data visualization, with practical exposure to analytics and applied AI problem-solving.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

Pursuing

Rajalakshmi Institute of Technology, Kuthambakkam, Chennai

Status: Pursuing

Class XII State Board 94.6% (2023)

Class X State Board Completed (2021)

PROJECTS

Geriatric Polypharmacy Clinical Decision Support System

2025

- Built an AI-based clinical decision support system to assess geriatric polypharmacy risk and generate structured clinical risk summaries.
- Designed ML models to predict adverse drug event risk and treatment effectiveness with interpretable probability outputs.
- Applied explainable AI to surface key factors influencing clinical risk, supporting transparent decision-making.
- Integrated evidence-backed recommendations using a retrieval-based AI approach.

Smart Tourist Safety & Emergency Mobile Application (Ongoing)

Ongoing

- Developing a Flutter-based mobile application focused on safety for women tourists, combining preventive and reactive safety mechanisms.
- Implemented reactive emergency features including one-tap SOS and live GPS location sharing to alert emergency contacts and nearby authorities.
- Designing an AI-powered conversational assistant as a preventive layer to provide safety guidance, situational awareness, and early intervention support.

INTERNSHIP

Data Science Intern – Tarcin Robotic LLP

Oct 2025 – June 2026

- Worked on real-time analytics projects using **Grafana** to build interactive dashboards for monitoring and decision support.
- Served as team lead for a principal and management-level dashboard, coordinating with mentors and teammates to define metrics and insights.
- Developed additional live dashboards beyond the assigned project, including visualization of student scores and results from ongoing hackathons.
- Collaborated closely with mentors to translate raw datasets into meaningful insights for institutional review and analysis.

HACKATHONS & COMPETITIONS

Nimirndhu Nil Hackathon

2025

- Designed an AI-driven mobile safety solution for women tourists, focusing on preventive guidance and reactive emergency response.

Shell Hackathon

2025

- Built a machine learning solution achieving **85% accuracy**, demonstrating effective model selection and evaluation under time constraints.

AOS Hackathon

2025

- Part of a **Top 25 selected team**, contributing to research and ideation while supporting the team through learning and applying basic web development concepts.

SKILLS

Programming: Python, SQL

AI / ML: Machine Learning, Explainable AI, LLMs, RAG

Data & Visualization: Pandas, NumPy, Grafana, Power BI

Frameworks & Tools: Scikit-learn, Flask, Streamlit, Git

Languages: Tamil, English, Japanese (JLPT Certified)

Soft Skills: Leadership, Team Collaboration, Problem Solving

Core Concepts: DBMS, Statistics, Data Structures (Basics)

CERTIFICATIONS

- **Introduction to Large Language Models** – Google Cloud (Coursera), 2025
- **Machine Learning and Deep Learning** – IBM SkillsBuild, 2025
- **Conversational Data Analysis with LLMs** – AICTE & VOIS (Edunet Foundation), *4-week Virtual Internship*
- **Data Analytics Job Simulation** – Tata Group (Forage), 2025
